New Mexico State University

INTRODUCTION

While New Mexico was still a territory, 23 years before it was to become the 47th state of the United States, the settlers of the Mesilla Valley recognized the need for an advanced educational system. This recognition, and the energetic efforts of leading citizens, resulted in the founding of the Las Cruces College in 1888. The territorial legislature of 1889 established the land-grant agricultural college and experiment station which officially opened on January 21, 1890. During its first full academic year, the college became known as the New Mexico College of Agriculture and Mechanic Arts, the first degree-granting institution in the territory. In 1960, the growth and maturity of the college were formally recognized when the New Mexico Constitution was amended to change the name of the institution to New Mexico State University. Since 1963, the institution has held continuous accreditation status, at the doctoral level, by the North Central Association of Colleges and Schools. New Mexico State University, under the provisions of the Morrill Act of 1862 and subsequent federal legislation, continues to provide a liberal and practical education for students and to sustain programs of research, extension education, and public service. New Mexico State University is classified as a Carnegie Doctoral/Research Universities-Extensive and is a member of the Hispanic Association of Colleges and Universities (HACU).

New Mexico State University is the land grant university of the state of New Mexico. As a thriving center of higher education, deeply rooted in the southwestern tradition, its role as a comprehensive university is recognized throughout the state. New Mexico State University offers a wide variety of programs through the Graduate School and the colleges: Agriculture and Home Economics, Arts and Sciences, Business Administration and Economics, Education, Engineering, and Health and Social Services. The 22 doctoral programs are limited primarily to agriculture, education, engineering, and the sciences; the specialist in education degree is offered in 3 study areas; there are 50 master's degree programs and 72 baccalaureate degree programs. At its four branch community colleges, Alamogordo, Carlsbad, Doña Ana and Grants, New Mexico State University offers academic, vocational/technical, and continuing education programs. In accord with its land-grant mission, New Mexico State University provides informal, off-campus educational programs through the Cooperative Extension Service. Through a statewide network of 13 research facilities, the Agricultural Experiment Station conducts basic and applied research supporting agriculture, natural resources management, environmental quality, and improved quality of life.

Overall responsibility for the university resides in an autonomous Board of Regents appointed by the Governor of the State and confirmed by the State Senate. The Board delegates authority for the internal management of the institution to the president. The faculty elects a Faculty Senate which has legislative jurisdiction over policies affecting the academic mission of the university.

New Mexico State University

Main & Branch Community Colleges Campuses

New Mexico State University consists of a main campus and four branch community college campuses. The main campus and Doña Ana Branch Community College are located in the city of Las Cruces; the Alamogordo Branch Community College is located in the city of Alamogordo, which lies in the foothills at the base of the Sacramento Mountains; the Carlsbad Branch Community College is located in the southeastern corner of the state in the city of Carlsbad; and the Grants Branch Community College is located in the city of Grants in the northwestern corner of the state. In addition, the main campus provides courses and academic programs via distance education technologies.

New Mexico State University

Board of Regents

Adelmo E. Archuleta, Appointed Regent from Albuquerque for term expiring January 1, 2003

Laura M. Coniff, Appointed Regent from Las Cruces for term expiring January 2007

James C. Manatt, Jr., Appointed Regent from Roswell for term expiring January 1, 2005

Antonia L. Roybal, Appointed Regent from Las Cruces for term expiring January 1, 2003 (Student Regent)

John J. Van Sweden, Appointed Regent from Raton for term expiring January 1, 2003

Ex Officio Members

Gary Johnson, Governor of New Mexico, Ex Officio Regent from Santa Fe

Michael J. Davis, State Superintendent of Public Instruction, Ex Officio Regent from Santa Fe

Donna Alden, Chair, Faculty Senate

Jake Hill, President, Associated Students of NMSU

Administration

President G. Jay Gogue

Provost William Flores

Business and Finance, Vice President James L. McDonough

Distance Education and Extended Learning, Vice Provost Carmen Gonzales

Human and Physical Resources, Vice President Benjamin Woods

Information and Technological Services/Chief Information Officer, Vice Provost (Interim) David Rocks

International Programs, Vice Provost (Interim) Ida Baca

Research, Vice Provost Daniel J. Dwyer

Student Services and Dean of Students, Vice President Gladys De Necochea

University Advancement, Vice President Rebecca Dukes

New Mexico State University
Strategic Directions Summary*

Mission Statement

New Mexico State University is the state's land-grant university, serving the educational needs of New Mexico's diverse population through comprehensive programs of education, research, extension education, and public service.

Mission-Oriented Goals

- Enhance NMSU's undergraduate experience and maintain NMSU as the university of choice for New Mexico residents.
- Continue NMSU's high-quality graduate and research programs.
- Expand the capacity and delivery of extension education, other outreach programs, and service in keeping with NMSU's land-grant mission.

Mission-Supporting Goals

- Attract, develop, reward, and retain a high-quality faculty and staff.
- Provide opportunities for faculty and staff to enhance their knowledge and skills in working with an increasingly diverse university community.
- Increase the diversity of NMSU's faculty and staff with the goal of having NMSU's employee profile represent the appropriate market pool in terms of race/ethnicity, gender, and people with disabilities.
- Encourage the enrollment at NMSU of a diverse student body in terms of race/ethnicity, gender and students with disabilities, at both the undergraduate and graduate levels.
- Maintain and expand the critical information resources and student services of the university. Maintain up-to-date scholarly information and library services, consistent with Carnegie Doctoral/Research Universities-Extensive, to enhance education, research, and service.
- Plan, develop, manage, and maintain the physical infrastructure of the university.
- Utilize financial resources effectively and efficiently.
- Strengthen understanding of NMSU so that the public makes full use of the university's expertise and resources.

New Mexico State University

Commission on Higher Education for the State of New Mexico

The Commission on Higher Education (CHE) is the state-level post-secondary coordinating agency in New Mexico. Created by statute in 1951, the CHE's stated purpose was to make recommendations for adequate and equitable funding of the state's higher education institutions. It currently has funding recommendation and financial oversight responsibilities for all public post-secondary institutions in the state, including the universities, two-year colleges and vocational institutions, as well as the New Mexico School for the Deaf and the New Mexico School for the Visually Handicapped.

In 1973, the commission was given statutory responsibility for a continuing program of statewide planning for post-secondary education. In the years since, the New Mexico Legislature has given the CHE a range of additional responsibilities, including administration of state financial aid programs, academic program review, graduate program approval, approval of new institutions, recommendations on capital outlay funding and approval of institutional operating budgets.

New Mexico State University's Peer Institutions*

In Region:

- Colorado State University – Fort Collins
- Iowa State University – Ames
- Kansas State University – Manhattan
- Louisiana State University – Baton Rouge
- Oklahoma State University – Stillwater
- Oregon State University – Corvallis
- Texas A & M University – College Station
- University of Arizona – Tucson
- University of Arkansas – Fayetteville
- University of Missouri – Columbia
- University of Wyoming – Laramie
- Utah State University – Logan
- Washington State University – Pullman

Out of Region:

- Clemson University – Clemson, South Carolina
- University of Tennessee – Knoxville
- Virginia Polytechnic Institute & State University – Blacksburg

* The peer institutions were selected by the Commission on Higher Education in 1990.

New Mexico State University

College of Agriculture and Home Economics

In 1889, the territorial legislature authorized the New Mexico Agricultural College and Agricultural Experiment Station at Las Cruces. Today, the dean and chief administrative officer assumes the overall leadership of the three interrelated components of the college: academic programs, Agricultural Experiment Station, and the Cooperative Extension Service. Academic programs included instructional activities in eight academic departments. The Agricultural Experiment Station funds many of the research projects carried out in the academic and nonacademic departments, as well as the Agricultural Science Centers throughout the state. Faculty and staff of the Cooperative Extension Service primarily teach informal, out-of-the-classroom educational programs in agriculture, home economics, community development, and 4-H and youth development throughout the state. Additional departments in the college are Agricultural Communications and the Indian Resource Development Program.

Academic Departments

College of Arts & Sciences

The College of Arts and Sciences traces its origin to 1917 when it was known as the School of General Science. The present College of Arts and Sciences is comprised of 23 academic departments, the College Advising Center and the Research Center. Administered by the dean and two associate deans, the college provides programs of research and creative endeavors in the arts, humanities, sciences, and social sciences.

College of Business Administration & Economics

The College of Business Administration and Economics was created in 1964. The dean of the college assumes leadership of five academic departments and the Bureau for Business Research. The college has been predominantly oriented toward teaching at the undergraduate level and, in more recent years, graduate-level programs. The college has developed substantial research for competencies focused upon New Mexico, Mexico and other border economic, business, and social issues; leadership and substitute-for-leadership issues; and issues in public utility regulation.

College of Education

The College of Teacher Education became the College of Education in 1967. The dean and associate deans of the College provide leadership for five academic departments and the Educational Research Center. The undergraduate and graduate programs prepare individuals for licensure to work in public and private schools. The College, as a whole, is accredited by the State Department of Education within New Mexico and the National Council for the Accreditation of Teacher Education.

College of Engineering

Engineering education was an early part of the course offerings of the New Mexico College of Agriculture and Mechanic Arts, now known as New Mexico State University. Leadership for the College of Engineering is provided by the dean, associate and assistant deans, and director of the Engineering Research Center. Today, there are seven academic departments in the college. Research administered by the Engineering Research Center is a vital part of the college's activities. All of the programs in the College of Engineering are accredited by the Accreditation Board for Engineering and Technology (ABET), the nationally recognized engineering accreditation agency.

College of Health & Social Services

The College of Health and Social Services, established in 1979, is administered by the dean and associate dean. The college brings together fields of study that apply directly to the quality of life in a rapidly changing society. In addition to three academic departments, the college has a research center, which provides assistance to the faculty in the conduct of scientific research and professional training. A part of the college's School of Social Work is the Family Preservation Institute, an educational research and training center that engages in activities related to family preservation in multi-cultural settings. The college's Health Science Department is affiliated with the Southern Area Health Education Center (SoAHEC), Border Health Education Training Center (BHETC), Border Health Office (BHO), and the Border Epidemiology and Environmental Health Center (BEC).

Graduate School

Although the first master's degree was awarded in 1897, the Graduate School was not formally established until 1956. The Graduate School offers 24 doctoral programs; 3 study areas for the education specialist degree; and 51 master's degree programs. The dean and associate dean provide the leadership for the Graduate School. Graduate faculty involvement in generation of academic policy and operating procedure is achieved primarily through the Graduate Council.

New Mexico State University

Budget & Finance

As a public institution, New Mexico State University is funded, in part, through an appropriation by the New Mexico legislature and the governor. The state budget approval process authorizes general fund appropriations as well as overall expenditure levels. General fund appropriations for Instruction and General (I & G) are largely the result of a workload-based funding formula and are made as one lump-sum appropriation to each campus. In addition, line-item appropriations provide partial support for a number of research and public service activities of the university. The state also appropriates funds to New Mexico State University on a project-by-project basis for capital improvements.

New Mexico State University

Research

Since its founding as New Mexico's land-grant college in 1888, New Mexico State University has encouraged and supported creative scholarly activity of its faculty and students. New Mexico State University is among the top 100 colleges and universities in research and development in the nation. Most early research followed mandates of the founding legislation of land-grant colleges by generating knowledge useful in agriculture and engineering. Research has expanded from this focus on applied natural sciences to encompass all disciplines of the university. Today, creative scholarly activity leads to basic scientific discoveries as well as practical applications which emanate from natural and social sciences, arts, humanities, business, and health sciences. This enriches academic programs for students, provides training and employment opportunities to students, and attracts support to enhance university facilities. Research Centers in the university's six colleges and the Physical Science Laboratory administer more than \$120 million in research activity each year.

Special Classifications/Rankings

New Mexico State University

Academic Centers and Research Institutes

Agriculture Experiment Station conducts basic and applied research supporting agriculture, natural resources management, environmental quality, and improved quality of life.

Arts and Sciences Research Center assists the faculty of the College of Arts and Sciences in the conduct of their research and in securing outside funding for research activities.

Bureau for Business Research and Services provides business and economic research services to the public and private sectors of the state, region, and country and management services to business organizations and associations, government agencies and the public.

Educational Research Center provides support to the faculty and departments in the College of Education in identifying, procuring, coordinating, and monitoring all external funding. The center also coordinates the college's off-campus program.

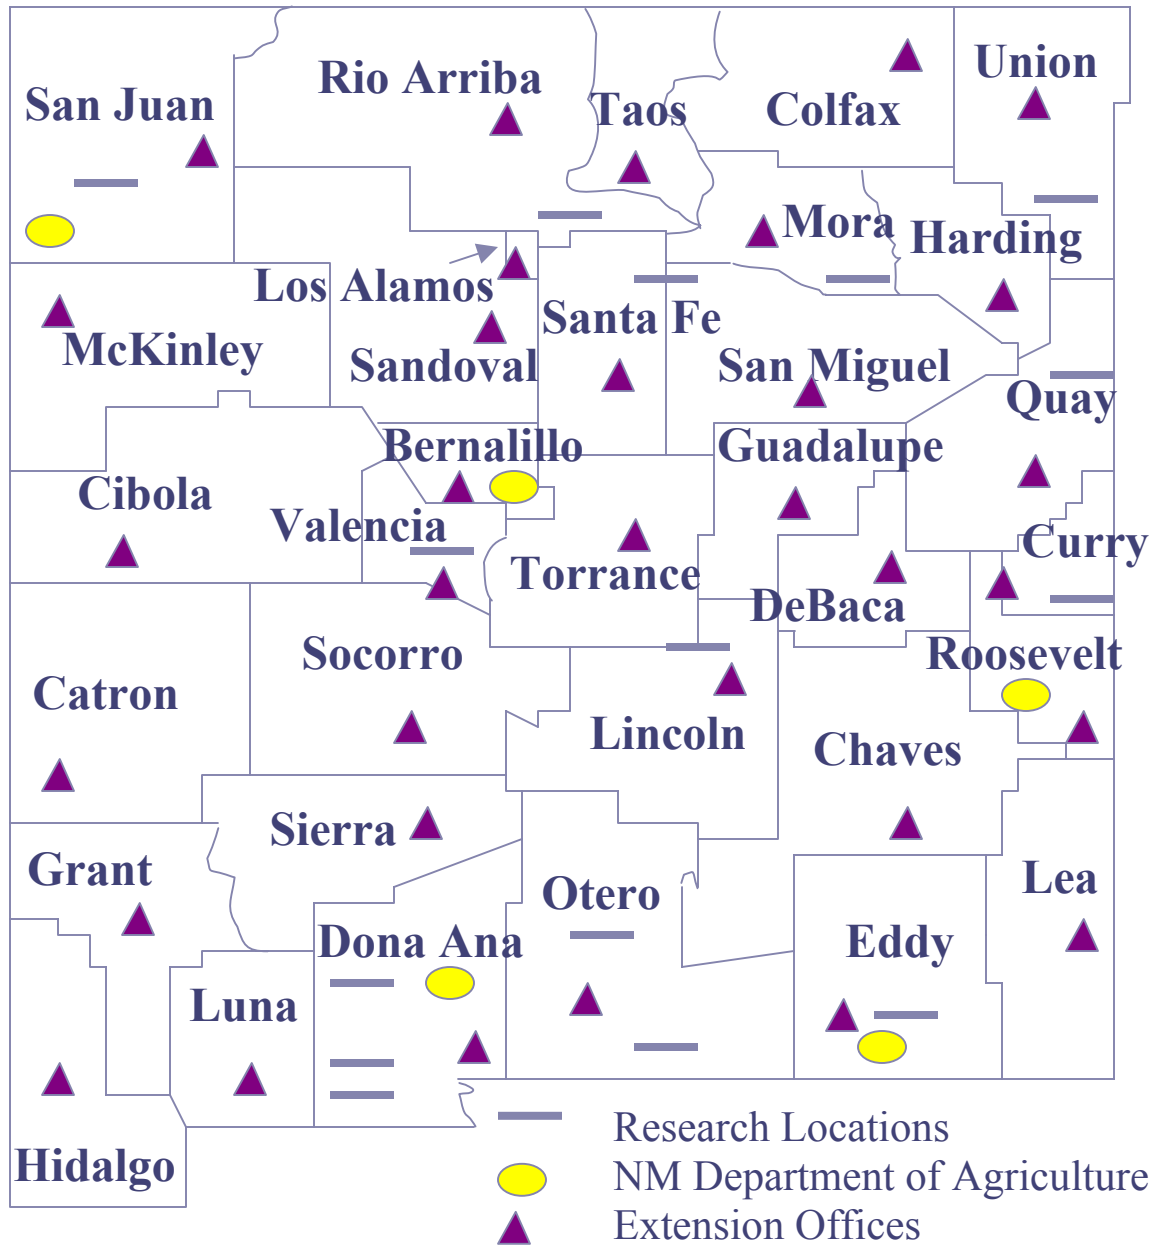

Engineering Research Center provides leadership and assistance to College of Engineering faculty and departments actively engaged in research.

Health and Social Services Research Center provides assistance to the faculty and departments in the College of Health and Social Services in the conduct of scientific research and professional training.

Physical Science Laboratory, a nonprofit research and development arm of NMSU, provides a wide variety of research and development services to support defense and space activities around the world.

Water Resources Research Institute's overall mission is to develop and disseminate knowledge that will assist the state and nation in solving water problems.

Impact on
State of
New
Mexico

New Mexico State University

Center for International Programs

The Center for International Programs (CIP) was established as a focal point for the coordination of all international activities on campus. By providing necessary support, the center facilitates international involvement of interested staff and students. The support consists of assistance with administrative aspects of international students' programs at NMSU and with their personal needs and extra-curricular activities. Educational and intercultural experiences are developed for NMSU staff, students, and the community. Curricular offerings relevant to students with international interests are developed and implemented. Leadership is also provided to develop and facilitate international research activities among NMSU faculty and staff. Services offered by CIP include admission of foreign students, community outreach programs, foreign scholar (J-1 visa) services, foreign student services, immigration services, internationalization of curriculum activities, international education programs and services, study abroad programs and services, training programs and services, technical assistance and cooperation programs and services.

University Advancement

University Advancement comprises the offices of Alumni Relations, Development, Advancement Services, University Communications and the New Mexico State University Foundation, Inc. These areas link the alumni, community, state, and the nation with the university. Visit their website at

<http://www.nmsu.edu/~advance>

Aggie Alumni are 76,236 strong in over 50 chapters in 16 states across the U.S. and in Yemen, Brazil and Mexico with 473 life members. The International Board of Directors and The Executive Council set goals and policy for the Association. They encourage alums to recruit students to the university, promote participation on university boards and committees and provide mentoring networking opportunities for alums with current and prospective students.

Development opportunities for the university are secured through private gifts to the institution from individuals, foundations and corporations. Givers make their gifts to the university through the New Mexico State University Foundation, a separate, non-profit entity managed by a volunteer board of directors. The overall endowment is in excess of \$86 million dollars. Gifts can be made to the Foundation in the form of cash, securities, real estate, tangible personal property, paid up life insurance, gifts via a will, trust, or qualified retirement plan.

The Advancement Services area maintains the alumni and friends database of 118,000 records. They are responsible for the accounting, receipting and reporting of all charitable gifts to the university and the foundation. As the "institutional memory" for our alumni, this office serves alumni, colleges and departments on campus and around the globe.

University Communications is the central public information and marketing office for New Mexico State University, informing people inside and outside the institution about activities that advance NMSU teaching, research and public service. They are also responsible for institutional-level marketing aimed at student recruitment. The office produces print and on-line publications, manages the top levels of the university Web site, and provides a wide range of photography services.

Doña Ana Branch Community College

Carlsbad Branch Community College

Grants Branch Community College

The branch community colleges are designed to help local citizens achieve their personal educational goals and to meet the job training needs of local business, industry, and government. The branch community colleges offer

- freshman and sophomore academic courses with credits that transfer to four-year colleges and universities,
- vocational-technical certificates and associate degree programs that provide students with basic job skills to enter the work force,
- adult basic education and developmental education to help students acquire basic skills in reading, English, and mathematics,
- noncredit community service and continuing programs for students seeking professional or personal enrichment.
